Using A-VC01 VersaCam

Connect the A-VC01 VersaCam to your computer via the provided USB cable. This connection not only powers the camera, but also allows you to use it as a webcam and microphone. The camera will be automatically recognised as 'A-VC01' and can be immediately used.

The HDMI output of the A-VC01 VersaCam only displays the video and is not used to transfer audio or power the camera. You can use both the USB and HDMI outputs simultaneously.
